## About Us

Established in 1988 in Sydney, Australia, Temperature Controls Pty Ltd is an independent, management owned manufacturing company specialising in the production of temperature and level sensors for all industries and applications.

We have the largest capacity of any company in Australia manufacturing temperature sensors and thermowells.

Temperature Controls maintain Australia's largest stock of Thermocouples, RTD Sensors, Thermowells, Liquid Level Switches and Extension Cables in single, multi pair and steel wired armour configuration.

Temperature Controls are an official distributor for the Shinko range of temperature controllers from Japan. In 2006 Temperature Controls became the first Australian manufacturer to have thermocouples and RTD sensors IECEx approved for use in the Hazardous Areas, Ex d Flameproof and Ex e Increased Safety. All these products are shown in this catalogue which details the model number, description and price. Almost all of these items are available for shipping on day of order, subject to prior sale.

To assist customers in deciding which style of Temperature or Level sensor will suit their application, we have over 800 drawings, instruction manuals and product data sheets available on our web site.

Temperature Controls supply CAD drawings of custom built assemblies if required and welcome any enquiry to provide a quotation.

Temperature Controls Pty Ltd have sites in Sydney, Melbourne and Brisbane.

Our Sefton facility in Sydney's south west is a modern, well equipped, 2200 m<sup>2</sup> over 2 factories where design, manufacture, machining, mechanical assembly and testing of components is carried out to customers specifications and requirements.

Sefton is the Head Office where the majority of stock is maintained, along with calibration equipment for use from - 20 °C to +1200 °C. To compliment our manufacturing facility a specialised bulk warehouse facility is in place to maintain a large inventory of screw in Thermowells, male connectors, Multipair and SWA thermocouple cables.

Our Yarraville premises in Melbourne's inner west maintain a stock range as per our catalogue and raw material for limited production of temperature assemblies.

At both sites we have specialised equipment to perform precision machining, welding (TIG / MIG and Inverter Plasma ) along with repetition work.

Our Archerfield premises in Brisbane's south maintain a comprehensive range of stock temperature sensors, connectors, cables and temperature controllers to service customers requirements.

Temperature Controls Pty Ltd are unique in the Australian market in that we manufacture screwed and flanged thermowells and fittings in-house using centre lathes, CNC lathes and gundrilling machines.

**Prices in this catalogue are based on exchange rates and supplier prices at time of printing; prices may vary at time of order; prices quoted exclude GST.**

**Due to ongoing product development specifications may change from those listed at publication.**

# THERMOCOUPLE PROJECT STYLES

Temperature Controls supply specialised sensors for Refinery, Chemical, Brick and Cement manufacturing. Some examples are:

**SD 012**

#### Nipple Connection

- Offers Spring Loading or welded stem
- Provides fast response in thermowell or process

**SD 017**

#### Nipple/Union/Nipple NUN Connection

- Offers Spring Loading
- Ability to remove probe without disconnecting wiring.

**SD 020**

#### Pipe Nipple Extension PNE

- Offers Spring Loading
- Lagging extension so head termination is removed from heat source.

**SD 018**

#### Ceramic Furnace Probe CFP

- Ceramic sheath over Thermocouple Element.
- Lagging extension so Lead termination is removed from heat source.
- Suitable for use to 1800°C

**SD 176**

#### Metal Protection Probe MPP

- High Nickel Alloy Protection Sheath Over Element
- Strong - not easily broken.
- Inconel 600/601, 316, 446, 253 MA Stainless Steels

# TCA THERMOCOUPLE SENSORS

Temperature Controls are able to manufacture Thermocouple sensors to suit your application. Our scope of MIMs (Mineral Insulated Metal Sheath) thermocouples range from 0.5mm dia to 12.7mm dia with heavy wall, We keep extensive stocks of single, duplex, triplex conductor configurations with special stainless steel and high nickel alloy sheath material. We can also manufacture plastic industry sensors to order and thermocouple wire cut to length and junctioned by TIG welding

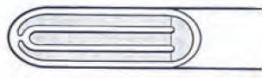

Standard Assemblies have insulated junctions; bonded or exposed junctions on request.

## Exposed

Fastest Response, recommended For Air Temperature.

## Grounded

Fast Response, rapid transfer of heat to junction. Not suited to non insulated transmitters or Data Loggers.

## Insulated

Normal Response, Insulation resistance, typically 500V DC > 100m Ω Prevents stray voltages affecting measuring signal.

**SD 1457**

## Cold end terminations include:

### Mini Plug

### Stainless Steel Armour

### Threaded Pot Seal

## Hot end terminations include:

### Weld on Stainless Steel Pad

Mims

### Weld on Stainless Steel Solid Tip

Mims

### Hose Clamp fitted to Tip

### Washer fitted to Tip

**Precious Metal Thermocouples.** Temperature Controls produce Thermocouples for high temperature furnace use above 1200 deg C using Platinum / Rhodium conductors Types R, S & B. These thermocouples are subject to market variations in price and need to be quoted on application. As a service to customers Temperature Controls accepts the return of **Platinum thermocouple wire for salvage** of the material and credits the value to the customer.

## Quick connect Plug in TEMP-SMART Sensors

A range of temperature sensors that can be plugged in using off the shelf DIN style connectors, or industry standard M12 proximity switch style leads. A 2 wire transmitter can be incorporated into the main body eliminating the requirement for a terminal head or screw onto existing M12 sensors.

This transmitter or plug assembly can suit most temperature probes manufactured by Temperature Controls.

# TCA DAIRY & PHARMACEUTICAL SENSORS

Assemblies with Triclover or BSM connections for Sanitary or CIP applications

Temperature Controls offer a range of made to order RTD temperature assemblies hygienic / CIP applications ( clean in process ) in pharmaceutical, chemical and food or beverage processing plants.

The sensors can feature a reduced tip to provide fast response and heavy duty support tube to ensure the terminal head is secure, making them suitable for use in vibration or hostile locations. The Triclover or BSM caps are welded both sides to 316 Stainless Steel bar and tube and are machined / polished to a finish that exceeds the minimum 0.4 uM surface finish required.

Optional Electro polish available at extra cost.

The wetted process surfaces are free of pits, crevices and weld pockets to prevent corrosion and bacteria growth.

Standard Construction:

PT100Ω @ 0°C As per DIN43760,  
IEC60751 Alpha Value 0.003850  
Class A tolerance 3 Wire

Terminal heads available include  
Stainless Steel  
Reinforced Bakelite  
Polypropylene

**SD 041**

Triclover Blank Cap

**SD 044**

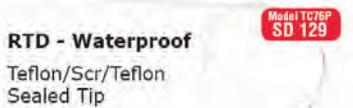

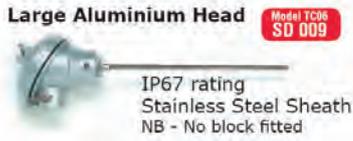

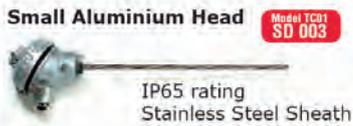

BSM Blank Cap

All suitable to provide excellent resistance to acids, alkalines and moisture penetration.

TCPSURFACE2	RTD PT100	TEFLON	2M	\$112.00
TCPSURFACE5	RTD PT100	TEFLON	5M	\$127.00

Resistance Temperature Detectors ( RTD ) offer the highest standard of accuracy and stability of any temperature sensor over the range -200 to 600 °C .

The standard type used is Platinum PT 100 ohm with PT 500 and PT 1000 Ohm sensors available for special purpose use.

Standard PT100 Ω @ 0°C As per DIN 43760, IEC 60751 Alpha Value 0.003850

# TCA STOCK HVAC RTD SENSORS

# SPECIAL APPLICATION SENSORS

Thermal Ribbons are thin highly flexible RTD Sensors for surface measurement, offering fast time response. These are constructed using laminated silicon rubber / polyimide materials for use in extreme environments.

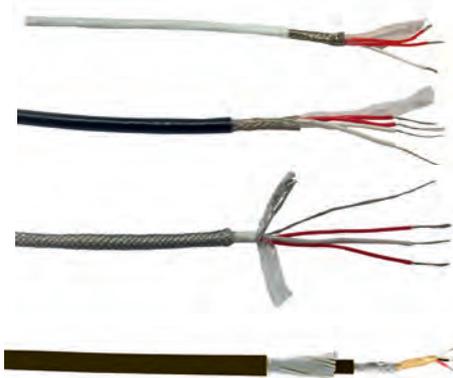

Applications include tank or pipe surface temperatures

MODEL NO.	DESCRIPTION	PRICE
TCS386PD1236	PT 100 Ohm Class B 0.00385 Element 9.5 x 101.6 x 1.9mm thick. Silicon rubber with polyimide backing with 3 x 24 AWG Teflon Tails 1000mm long. Temperature range -60 to 220 Deg C Time constant 0.6 seconds	\$285.00
TCS667PDZ40AC	PT 100 Ohm Class B 0.00385 Element 5 x 15 x 2mm thick. Silicon rubber Elastomer cover & foil backing with 3 x 24 AWG silicon insulated tails 1000mm long *Water Resistant Temperature range -50 to +155 Deg C Time constant 1.3 seconds	\$116.00
TCPSRPAD2	PT 100 Ohm Class B Element 50 x 10 x 1.8mm thick. Silicon rubber pad 3 x 24 AWG wires 2500mm long Temperature range -50 to 200 Deg C	\$159.00

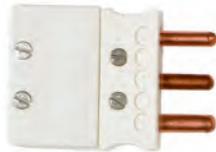

## RTD Sensor Cables and Connectors

RTD Cables available in 3 or 4 wire in PVC, Teflon, Silicon Rubber, Fibreglass, Stainless Steel Braiding and SWA configurations. For details on our complete range of ex stock cables & special construction cables contact our office for more details.

MODEL	CALIBRATION	SHEATH MATERIAL	CONDUCTOR SIZE

# HUMIDITY & TEMPERATURE TRANSMITTERS

The RHT series of wall & duct mount transmitters incorporate high accuracy and great stability relative humidity and temperature sensors. They convert the measured values into linear 4-20mA or 0-10V output signal. The RHT series are easily ranged using the PC Based interface.

## WALL MOUNT

SD 1672

MODEL	DESCRIPTION	PRICE
TCRHTWM	Wall Mount 0-100 °C 12-30V DC 2 Wire Isolated 4-20mA outputs	\$252.00
TCRHTWMV10	Wall Mount 0-100 °C 18-30V DC Supply Non Isolated 0-10V outputs	\$260.00

## DUCT MOUNT

SD 1672

MODEL	DESCRIPTION	PRICE
TCRHTDM250	Duct Mount 250mm Long x 14mm diameter 0-100 °C, 0-100%, 12-30V DC 2 wire Isolated 4-20mA outputs	\$289.00
TCRHTDM400	Duct Mount 400mm Long x 14mm diameter 0-100 °C, 0-100 %, 12-30V DC 2 wire Isolated 4-20mA outputs	\$289.00
TCRHTDMV10	Duct Mount 250mm Long x 14mm diameter 0-100 °C, 0-100 %, 18-30V Supply Non Isolated 0-10V outputs	\$289.00

## Humidity & Temperature Controller

N323RHT is a digital temperature and humidity controller with three relay outputs that may be individually configured to function as control or alarm outputs.

The controller comes complete with a humidity / temperature sensor with 3 meter long cable.

100-240V AC or 12-24V DC / AC Supply  
0-100% Humidity  
-20 to 100 °C Temperature

SD 1829

MODEL	DESCRIPTION	PRICE
TCN323RHT	N323RHT Humidity / Temperature 240V	\$265.00
TCN323RHT12	N323RHT Humidity / Temperature 12-24V DC	\$280.00

## LARGE LED DISPLAY / INDICATOR

This is a high performance universal digital indicator with 56mm high display for high visibility at long distances.

- Accepts all Thermocouples, RTD PT100, 4-20mA
- -1999 to 9999
- 2 Alarm outputs
- 4-20 Ma Output
- 100-240 VAC or 12-24 VDC Supply
- 24V DC output for transmitters

MODEL	DESCRIPTION	PRICE
TCN1500G	N1500-G BIG DIGIT DISPLAY INDICATOR	\$ 695.00

# TCA HAZARDOUS AREA SENSORS IECEX CERTIFICATION

## Thermocouples and RTD Sensors are a source of Ignition

Electrical equipment including temperature sensors for use in Hazardous Areas needs to be designed and constructed in such a way that it will not provide a source of ignition. This equipment should be fully tested and certified with a certificate of compliance issued by an Independent Authority. Temperature Controls Pty Ltd have developed a range of temperature sensors with Internationally recognized IECEX certification for Ex d Flameproof, Ex e Increased Safety and Ex tD Dust Ignition Proof. This approval covers the terminal head and the thermocouple or RTD sensor allowing Temperature Controls to supply a complete assembly with IECEX approval or fit any approved Transmitter Housing or Enclosure to our IECEX approved temperature element .

Temperature Controls are able to supply Thermocouples and RTD sensors with 4 x Types of Protection

- Ex ia Intrinsically Safe Applications
- Ex e Increased Safety Applications
- Ex d Flame Proof Applications
- Ex tD Protection by Enclosures in Dust

**IECEX Certificate of Conformity**

*Our thermocouples and RTD sensors have IECEX Ex d/e Hazardous Area Certified*

## Ex ia " Intrinsically Safe " Protection suitable for use in Zone 0, 1 & 2

" The electrical energy available in circuits and equipment, is limited to a level too low to ignite the most easily ignitable gas mixtures in a hazardous area. Intrinsically safe barriers, Zener or Transformer isolated Intrinsically safe barriers are installed in the circuit to limit current and voltage in the hazardous area to prevent sparking under fault conditions"

### RTD Sensors and thermocouples

RTD Sensors and thermocouples are considered to be simple apparatus and with appropriate barriers can be installed freely in IS circuits, (Ex ia) no further certification is required.

The RTD or Thermocouple must meet the requirements of the relevant IECEX Standard:

IEC 60079.11:2011 Explosive Atmospheres Part 11 Equipment Protection by intrinsic safety 'i' .

Section 6.3.12 Dielectric strength requirement

"500 VAC RMS Test Voltage of Insulation Resistance between Conductors or Conductors & Sheath for 2 Minutes"

All thermocouples and RTD sensors in the catalogue meeting these requirements can be offered.

The sensor will have a label attached .

Sensor Tested: Suitable for use

**Ex ia**

**Temperature Sensors with Transmitters**, 4—20 mA signals are the most commonly used signal in process control instrumentation; Temperature Controls have available multi input PC programmable head mount transmitters with IECEX Certificates of Compliance along with matching transformer isolating barriers with Certificates of Compliance.

# TCA HAZARDOUS AREA SENSORS IECEX CERTIFICATION

## Thermocouples and RTD Sensors are a source of Ignition

Ex e " Increased Safety " Protection

suitable for use in Zone 1 & 2

" All electrical connections and equipment incorporate special measures to reduce the probability of excessive temperatures and the occurrence of arcs and sparks in normal service "

Ex d " Flameproof Enclosure " Protection suitable for use in Zone 1 & 2

" All electrical connections and equipment are enclosed in a housing strong enough to contain any explosion and by using flame paths prevent any transmission outside the enclosure. "

DIP " Dust Ignition Proof " Protection

There are 3 Zones for Dust , Zone 20; 21 & 22 Equipment must meet the requirements as per IEC 60079-31 :2013

" Electrical equipment protected by enclosure and surface temperature limitation for use in explosive dust atmospheres " Protection by enclosures tD "for use in these zones.

Temperature Controls have a large number of IECEX approved assemblies and options to ensure a product complies.

# QUIKTIP THERMOCOUPLE JUNCTIONS

Thermocouple wire can be fabricated into accurate and dependable temperature sensors by joining the thermocouple conductors at the sensing end by using the Quiktip Thermocouple crimp junctions. Made of pure Nickel the crimp junctions are suited to field / site use of 24 or 20 AWG Thermocouple wires. Cut the wire to length, strip the end and crimp the Quiktip.

# OPTRIS INFRARED THERMOMETERS

Optris offers a comprehensive and innovative product range of Infrared thermometers for use in many industrial applications

**Compact Series:** Small compact Infrared thermometers or stationery use in confined and hot surroundings

MODEL	DESCRIPTION
OPTCSTCLT15CB3	-40 to 1030 Deg C 15:1 3 mtr lead 0—10V output Temperature Range Optics

SD 1825

## High Precision Series:

Stationary Infrared thermometers with high optical performance as well as double laser signal for measurement point adjustment.

MODEL	DESCRIPTION
OPTCTLT20CB3	-50 to 975Deg C 22:1 3 mtr lead 0—10V 4-20mA outputs Temperature Range Optics

SD 1826

## Infrared Cameras:

Compact Thermal Imagers for fast online applications including line scanning functionality. Optris PI200 & PI400 Thermal Imager providing thermal images in real time.

Optris PI640 VGA Resolution for Industrial and R& D processes.

All Optris cameras come with software as standard

Applications include, Metals, Glass, Hotspot detection and drone UAV flight mounting.

SD 1827

# TCA INFRARED THERMOMETERS

## Fully featured Hand Held Infrared Thermometers

Part No	Description	Price Each
TCGM550E	Hand Held Digital Infrared Thermometer in Blister Pack only Measuring Range -50 to 550 Deg C Distance to Spot 12:1 Emissivity 0.1 to 1.0 Accuracy +/- 1.5 Deg C or +/- 1.5%	\$65.00
TCGM900	Hand Held Digital Infrared Thermometer in Plastic carry case Measuring Range -50 to 900 Deg C Distance to Spot 12:1 Emissivity 0.1 to 1.0 Max/Min Dif/ Average Temperature Reading Hi/Lo Temperature Alarm Setting 12 Data Store / Recall Function Accuracy +/- 1.5 Deg C or +/- 1.5%	\$115.00
TCGM1350	Hand Held Digital Infrared Thermometer in Plastic carry case Measuring Range -18 to 1350 Deg C Distance to Spot 50:1 Emissivity 0.1 to 1.0 Max/Min Dif/ Average Temperature Reading Hi/Lo Temperature Alarm Setting 12 Data Store / Recall Function Accuracy +/- 1.5 Deg C or +/- 1.5%	\$345.00

SD 1981

# TEMPERATURE CALIBRATION

## AOIP MULTIFUNCTION FIELD SIGNAL CALIBRATOR

The CALYS 50 field multifunction calibrator is the perfect tool for advanced process maintenance and use on the test bench in all industries. Suitable for all field and laboratory measurements, it simultaneously measures and generates over two isolated channels various signals of temperature, resistance, process and frequency in one single instrument.

MODEL	DESCRIPTION
TCCALYS50	AOIP Field Temperature calibrator signal simulator and measure unit

## INFRA-RED BLACK BODY CALIBRATOR

The BB500 is a portable calibrator for Infrared temperature devices. Range 50 to 500 °C  
Accuracy +/- 0.1 °C + 50 to +100 °C +/- 0.2 °C + 101 °C to 350 +/- 0.4°C + 351 to 500 °C  
240V AC Supply

MODEL	DESCRIPTION
TCBB500	Portable Black Body Calibrator

# ISOTECH CALIBRATION EQUIPMENT

Isotech manufacture temperature calibration equipment for industrial calibrations as well as providing many laboratories worldwide with both primary and secondary reference equipment.

## Industrial Temperature Calibrators

The FAST-CAL range was developed to meet the needs of plants wanting to maintain their own calibration and test programmes of temperature sensors.

Available as a basic dry block calibrator or an ISO-9000 Calibration system where the Sensor under test is compared to a calibrated standard, for true traceability. Optional PC Interface, additional software is available for automatic calibration.

MODEL	FAST-CAL LOW	FAST-CAL HIGH
Range @ 20 Deg C	-35 Deg C to 140 Deg C	35 Deg C to 650 Deg C
Stability	0.02 Deg C	0.05 Deg C
Calibration Capacity	25mm DIA x 148mm	25mm DIA 148mm

SD 1220

### Isocal 6 Advanced Series

- Stirred Liquid Bath
- Dry Block Bath
- Black Body Source for IR Thermometers
- Calibrator for Surface Sensors
- Range covers -40 Deg C to 250 Deg C

## MILLIK PRECISION THERMOMETER

The milliK Precision Thermometer from Isotech sets a new standard for the high accuracy measurement and calibration of Platinum Resistance Thermometers, Thermistors, Thermocouple and Process Instrumentation (4-20mA) over the range -270°C to 1820°C. The milliK has two input channels for sensors and a third channel for current. It can be expanded to become a measuring system with up to 33 channels reading SPRTs, RTDs, Thermistors, or Thermocouples with the option to control calibration baths and log readings accurately.

## Standard Thermometers

Standard Platinum resistance thermometers with metallic sheath suitable for use in the range -196 Deg C to 670 Deg C supplied complete with certification. Contact our office or visit [www.temperature.com.au](http://www.temperature.com.au) for more information.

# DATALOGGERS

The Grant instruments Squirrel range of data loggers are easy to use, hand held, battery powered which can also be powered from a mains voltage supply. The universal inputs can accept virtually any type of sensor, thermocouple, RTD or milliamp signals. The Squirrel model range covers from 4 to 32 input channels and offer USB connectivity with the Squirrel view configuration and analysing software allowing export of data to Excel. Options available are WiFi or Ethernet connections.

MODEL
TCSQ2010

- 4 differential Universal Inputs
- 8 Single Ended Inputs
- Carry Case
- USB Lead
- Squirrel view Software
- 2 Alarm outputs

MODEL
TCSQ2020

- 8 differential Universal Inputs
- 16 Single Ended Inputs
- Carry Case
- USB Lead
- Squirrel view Software

## NOVUS DATA LOGGERS

Dataloggers have wide applications in the fields of biology, chemistry, pharmacy, logistics and industry.

**TagTemp-Stick** is an electronic temperature data logger, compact and robust, that dispenses use of cables for configuration and data collecting. Plugs directly into a USB interface of a computer with Windows® to communicate with the application LogChart II, which is the configuration and data analysis software for data loggers from TagTemp series. The TagTemp-Stick has a high accuracy internal temperature sensor. It is ideal for temperature recording in the transport and storage of refrigerated and frozen products, such as vaccines, blood products and food. Range -20 to + 70 Deg C

**TagTemp-USB** is a small portable electronic temperature logger. Its internal sensor measures local environment temperature and logs such values in an electronic memory. Logged data, can be later viewed and analysed on a PC where they can be opened in tabular and graph forms. Range -20 to + 70 Deg C

**LogBox-AA** is an electronic data logger with two input analog channels. Input data is stored in the loggers internal memory, for later download to a PC for visualization and analysis in the form of tables or graphs. The data is easily exported to spreadsheets. The LogChart-II is the software used to configure the logger, download and visualize data. The logger configuration allows defining the logger operation mode, including programming the start/stop time of data acquisition.

Other parameters such as signal input type, logging interval, etc, are easily selected through the LogChart-II software. Inputs RTD, Thermocouple Types K,J,T,N,R,S,B 4- 20 mA , 0-20 mA & 0 -10 V

**LogBox-RHT-LCD** is dual channel data loggers with built-in temperature and relative humidity sensors. They use a high quality industrial grade humidity sensor for accurate and reliable operation in applications such as transportation, food and goods storage, process auditing, pharmaceutical, HVAC and others. In the LogBox-RHT-LCD the temperature and humidity values are shown in the digital display. You can also check on the display the Minimum and maximum recorded values.

**FieldLogger** is a versatile, powerful and yet cost effective data logger handling analog, digital and other types of variables with high resolution and speed. It is a high performance; high connectivity instrument easy to configure and operate. It has 8 configurable analog inputs that can read thermocouples, Pt100, Pt1000, voltage and current signals. It also has 2 relay outputs and 8 digital ports individually configurable as inputs or outputs. It has a 10/100 Mbps Ethernet interface that allows for access through a browser (HTTP), FTP (client and server), e-mails sending (SMTP), SNMP and Modbus TCP.

**FieldLogger** has one USB interface to be connected to a computer (for configuration, monitoring and data download) and another USB port for plugging a flash driver for data retrieval. The 512k logging basic memory is used to store data and it can be greatly expanded with an SD card

# INOR TRANSMITTER

## TCIPAQC520S Head Mounted HART Transmitter SIL2 PC Programmable: Isolated Input / Output

**SD 1588**

1500 V Galvanic Isolation  
PC Programmable USB Socket  
Operating Voltage 10 —36 V DC  
Output 4-20, 20-4 Customized Temperature  
Linear for RTD & T/C  
Minimum Span 10 °C RTD 2mV TC  
33 mm Mounting Centre's  
Suitable for 5—95% RH conditions

MODEL	INPUT	PRICE
TCIPAQC520S	RTD, Thermocouples & Resistance	\$624.00

## TCAPAQ-3H Head Mounted 0—10 Volt Output HVAC Applications

**SD 1233**

4 Wire Separate Power  
No Galvanic Isolation  
Rangeable with Solder Pads  
Operating Voltage 15 —30 V DC  
0—10 V Output  
Span 50 / 100 / 150 / 200 °C  
33 mm Mounting Centre's

MODEL	INPUT	PRICE
TCAPAQ3HT	RTD PT 100 Ohm 3 Wire	\$139.00
TCAPAQ3HD	RTD PT 1000 Ohm 3 Wire	\$139.00

## TCAPAQ-L Low Cost DIN Rail Mounted 2 Wire Transmitter

**SD 1124**

2 Wire Loop Powered  
No Galvanic Isolation  
Rangeable with Solder Pads  
Operating Voltage 6.5—32 V DC  
4—20 mA Output  
Only 17.5 mm Wide  
Minimum Span 50 °C  
Suits 35 mm Rail

MODEL	INPUT	PRICE
TCAPAQLR	RTD PT 100 Ohm 3 Wire	\$175.00
TCAPAQLC	Thermocouple K,J,T & N	\$175.00

## TCMINIPAQ-L DIN Rail Mounted PC Programmable USB

**SD 1068**

2 Wire Loop Powered  
No Galvanic Isolation  
PC Programmable USB Socket  
Operating Voltage 8 —32 V DC  
4—20 mA Output  
Minimum Span RTD 10 °C, TC 2mV  
Suits 35 mm Rail

MODEL	INPUT	PRICE
TCMINIPAQL	PT 100, 1000 Ohm All Thermocouple Types	\$185.00

## TCIPAQ-L DIN Rail Mounted PC Programmable : Isolated Input/ Output

**SD 1087**

2 Wire Loop Powered  
1500 V Galvanic Isolation  
PC Programmable  
Operating Voltage 6.5 —36 V DC  
4—20 mA Output  
Accuracy +/- 0.1 % of span  
Minimum Span 10 °C RTD 2mV TC  
Suits 35 mm Rail

MODEL	INPUT	PRICE
TCIPAQL	PT 100, 1000 Ohm All Thermocouple Types	\$350.00

## TCIPAQ-4L DIN Rail Mounted Multi Function Universal 4 Wire Transmitter

**SD 1061**

4000 V Galvanic Isolation  
PC Programmable  
Inputs mV, Ohms, mA, up to 50 V  
Outputs 0—20 mA 4—20 mA 0/1- 5 V 0 /1—10 V  
Operating Voltage 90 - 240 v AC or 20—30 V DC  
Accuracy +/- 0.1 % of span  
Minimum Span 10 °C RTD 2mV TC  
Suits 35 mm Rail

MODEL	SUPPLY VOLTAGE	PRICE
TCIPAQ4L	90—240 V AC	\$590.00
TCIPAQ4L1	20—30 V DC	\$590.00

## ICON Programming Kit USB Connection

**SD 1479**

Suits all PC Programmable INOR Head mount and DIN rail mount Transmitters.

MODEL	PRICE
TCICON	USB Programming \$528.00

## TCISOPAQ11L DIN Rail Mounted Single Channel Loop Powered Isolator

**SD 1677**

2 Wire Loop Powered  
Input to output Galvanic Isolation  
0-20, 4-20mA Single input  
High Accuracy Negligible additional measurement errors in the loop

MODEL	PRICE
TCISOPAQ11L	2 Channel loop isolator \$275.00

# INOR TRANSMITTERS HEAD MOUNTED

## TCAPAQ Low Cost Head Mounted In Head 2 Wire Transmitter

**SD 1118**

2 Wire Loop Powered  
No Galvanic Isolation  
Rangeable with Solder Pads  
Operating Voltage 6.5–32 V DC  
4–20 mA Output  
Minimum Span RTD 50 °C  
33 mm Mounting Centre's

MODEL No	INPUT	PRICE
TCAPAQHRF	RTD PT 100 Ohm 3 Wire	\$110.00
TCAPAQHCF	Thermocouple K,J,T & N	\$110.00

## TCIPAQ-H Head Mounted PC Programmable : Isolated Input/ Output

**SD 1121**

2 Wire Loop Powered  
1500 V Galvanic Isolation  
PC Programmable  
Operating Voltage 6.5 –36 V DC  
4–20 mA Output  
Accuracy +/- 0.1 % of span  
Minimum Span 10 °C RTD 2mV TC  
33 mm Mounting Centre's

MODEL No	INPUT	PRICE
TCIPAQH	PT 100, 1000 Ohm All Thermocouple Types	\$325.00

## TCIPAQ-C202 Low Cost Head Mounted

**SD 1990**

2 Wire Loop Powered  
No Galvanic Isolation  
PC Programmable USB Socket  
Operating Voltage 8.5–32 V DC  
4–20 mA Output  
Minimum Span 20 °C  
33 mm Mounting Centre's  
Suitable for 100% RH conditions

MODEL No	INPUT	PRICE
TCIPAQC202	RTD PT 100 Ohm 3 Wire	\$110.00

## TCMINIPAQ Head Mounted PC Programmable USB

**SD 1029**

No Galvanic Isolation  
PC Programmable USB Socket  
Operating Voltage 8 –32 V DC  
4–20 mA Output  
Minimum Span 10 °C RTD 2mV TC  
33 mm Mounting Centre's  
Suitable for 100% RH conditions

MODEL No	INPUT	PRICE
TCMINIPAQH	PT 100, 1000 Ohm All Thermocouple Types	\$125.00

# NOVUS 2 WIRE TRANSMITTERS

## TX Block Head Mounted Non-Isolated USB PC Programmable

**SD 1922**

Novus PC programmable head mount transmitter.  
Input: RTD & Thermocouple  
Output Loop powered 4–40 mA  
12 to 30 Volt DC  
Non Isolated Input / Output  
Programmed with Micro-B USB

MODEL No	DESCRIPTION	PRICE
TCTXBLOCKUSB	HEAD MOUNT TRNSMITTER USB PROGRAMMABLE	\$ 95.00

## TX ISO Pack Head Mounted Isolated Input / Output PC Programmable

**SD 1821**

Novus PC programmable head mount transmitter.  
Input: RTD & Thermocouple  
Output Loop powered 4–40 mA  
12–25 Volt DC  
Isolated Input to Output 1000 v  
Programmed with Micro-B USB

MODEL No	INPUT	PRICE
TCTXISOPACK	HEAD MOUNT TRNSMITTER USB PROGRAMMABLE	\$ 155.00

## TX RAIL USB DIN RAIL Mounted PC Programmable

Novus PC programmable DIN rail mount transmitter.  
Input: RTD & Thermocouple  
Output Loop powered 4–40 mA  
12 to 30 Volt DC  
Non Isolated Input / Output  
Programmed with Micro-B USB

**SD 2020**

MODEL No	INPUT	PRICE
TCTXRAILUSB	DIN RAIL TRANSMITTER	\$ 100.00

## TX ISO RAIL DIN RAIL Mounted PC Programmable

**SD 1820**

Novus PC programmable DIN rail mount transmitter.  
Input: RTD & Thermocouple  
Output Loop powered 4–40 mA  
12–25 Volt DC  
Isolated Input to Output 1000 v  
Programmed with Micro-B USB

MODEL No	INPUT	PRICE
TCTXISORAIL	DIN RAIL TRANSMITTER	\$ 155.00

# TCA EX STOCK BARSTOCK THERMOWELLS

Temperature Controls keep off the shelf an extensive range of screwed Barstock thermowells in large quantities to suit thermocouples, RTD's and Bimetal thermometers; listed below are the most popular, contact our sales office to confirm current stock range.

# TCA THERMOWELLS BAR SROCK MACHINED

Thermowells are recommended for temperature sensors and thermometers in a process system to prevent damage to them from the pressure, velocity, abrasion and corrosive materials present in the process. The thermowell allows the removal and replacement of the temperature sensor without interference to the process gas or fluid. Temperature Controls specialise in the design and manufacture of thermowells, we have gun drilling and CNC machining capabilities to ensure a quality product; timely delivery and competitive pricing.

## We can supply thermowells in the following materials.

- 316;316L ;321; 321H; 304; 304L Stainless Steels
- Chrome Moly F11; F22
- Duplex and Super Duplex Stainless steel
- Inconel 600;601 or Incoloy
- Hastelloy C or B
- Monel 400
- Titanium Gr 2 or 12

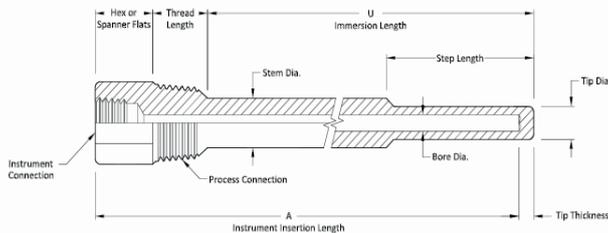

## Quality Assurance

- Testing and Certification Available for thermowells includes
- Material Certificates
- Wave Frequency Calculations
- Full Penetration Welding X Ray
- Bore Concentricity
- Pressure Test Internal / External
- Dye Penetrant Testing of Welds
- NACE
- Weld WPS,PQR to ASME IX
- Positive Material Identification
- Hard Face Coatings available**
- Stellite
- Tungsten Carbide
- Hard Chrome

A range of made to order Gas Actuated Thermometers 4" & 6" dial, stem diameters 12.0mm, Range -40 to 600 Deg C, Typical delivery = 4 weeks from order

# TEC BIMETAL THERMOMETERS

These thermometers comprise bimetallic strips coiled into spirals that expand with temperature, turning a needle to indicate process temperature. By coiling a very long strip it becomes much more sensitive to small temperature changes. The TEC Bimetal thermometers come with a 3" or 5" dial face; stainless steel body and 1/4" dia stem; 1/2" NPT fixed thread connection, reset adjustment screw and safety glass.

## Back Connected 3" dial Size only

## TCA TC305K Digital Thermometer

Specifications:

- Type K single Input ( Mini Plug )
- Auto Power Off
- Range Type K Input—50 to 1300 °C
- Accuracy +/- 0.3 % + 1°C
- Resolution 0.1 °C to 199.9 °C then 1°C
- Maximum Record Function
- Supplied in Rubber Boot with 1 x Teflon Bead Probe
- Recalibration Pot on Front Face.

**SD 345**

# RTD HAND HELD INSTRUMENTATION

## Center 370 Thermometer

A rugged IP67 waterproof housing to suit work environments supplied complete with 3.2mm dia Immersion hand probe range -100 to +300 °C  
 Accuracy +/- 0.1 % +/- 0.4 °C  
 Resolution 0.1 °C  
 RTD PT100 Ohm input 4 wire

Probes made to order as specified

MODEL No	DESCRIPTION	PRICE
TCP370HH	Handheld RTD Indicator PT100 Ohm	\$325.00

## DOSTMANN

The P700 series of precision hand held instruments is ideal for precise measurement and documentation of temperature, relative humidity, dewpoint and airflow.

Products features include:

- RS232 interface — galvanically isolated
- Optional DE-Graph software for graphic & tabular data documentation
- High accuracy (P755Pt/P750/P755 +/-0.03 Deg C)
- Physical calibration function (1 point, 2 points or 3 points)
- Channels are freely assignable
- Record maximum, minimum, average, and hold
- Differential temperature display on 2 channel instruments
- 9V battery or mains supply

**SD 1503**

Probes supplied separately

MODEL	Pt100 range accuracy between -100/ +200 C	INPUTS	PRICE

TC56000007		CARRY CASE FOR 7 SERIES	\$125.00
De-graph Software			\$327.00

## Motor Winding Thermistors and Thermal Cut Outs

Thermistors are built into the motor windings and protect the motor against locked-rotor conditions, continuous overload and high ambient temperature. The resistance in the sensor remains relatively low and constant over a wide temperature band and increases abruptly at a pre-determined temperature or trip point.

Thermal protection cut outs can also be built into the windings, bearing housings of motors and fitted to compressors as over or under temperature as part of the shut down circuitry.

Temperature Controls keep a comprehensive selection of PTC thermistors and thermal cut outs which can be fitted into housings to suit your application.

# ROTARY PADDLE SWITCHES

The rotary paddle switch operating principle is simple. The unit is usually mounted through a bin wall at the top, middle or low level point. During normal operation (no material present) a synchronous motor rotates the paddle at 1 RPM. When paddle rotation is impeded by material surrounding the paddle the motor will stall and cause the microswitch output to change state to signal an alarm or signal control.

Model TCSE110

SD 1352

Supply 240 VAC
Rotary Speed 1RPM
Connection 1" BSPP
Operational Temperature
-10 / 70 Deg C
Output Rating 5A SPDT
Price: \$499.00

Model TCSE3800C

SD 1352

Supply 240 VAC
Rotary Speed 1RPM
Connection 1 3/4" BSPP
Operational Temperature
-10 / 70 Deg C
Output Rating 3A SPDT
Price: \$465.00

For details on the complete range of paddles switches and accessories please contact [sales@temperature.com.au](mailto:sales@temperature.com.au)

# CABLE FLOAT SWITCH

Cable Level switches are made of moulded chemical resistant polypropylene to provide a low cost switch over long lengths.

The float contains a SPDT microswitch rated at 15 A 240 V AC with silicon cable for higher temperature applications.

Adjust the location of the weight on the cable to suit your switching points.

MODEL	DESCRIPTION	PRICE
TCMAC35M	CABLE SWITCH 5 MTR LONG WITH WEIGHT	\$39.00
TCMAC310M	CABLE SWITCH 10 MTR LONG WITH WEIGHT	\$49.00

# LEVEL SWITCHES

Multi-Float Level Switches made to order.

A magnet fitted inside the float actuates a reed switch making it change state as the float moves up or down the stem with the rise or fall in liquid. Multiple floats are fitted to provide accurate liquid switch positions or high low alarm output points.

**SD 189**

Large Magnetic Float Level Switch, 12.7 mm dia 316 Stainless Steel Stem  
Up to 5 Floats on stem, with common or individually wired reed switch contacts  
Normally Open / Normally Closed or Change over contacts at extra cost.  
Available with 2" BSPT Fixed Fitting or Optional Male Connector  
Table D or ANSI Flange Sizes available  
Maximum Length 3000 mm  
Maximum Temperature 180 Deg C  
Select terminal head to suit your application process conditions.

S3 316 S/S Float  
45 mm dia  
SG = 0.65

S4 316 S/S Float  
52 mm dia  
SG = 0.55

S1 316 S/S Float  
29 mm dia  
SG = 0.7  
Option SG 0.9 or SG 1.0

**SD 179**

Small Magnetic Float Level Switch, 8.0 mm dia 316 Stainless Steel Stem  
Up to 5 Floats on stem, with common or individually wired reed switch contacts  
Normally Open / Normally Closed or Change over contacts at extra cost.  
Available with 1" BSPT Fixed Fitting or Optional Male Connector  
Table D or ANSI Flange Sizes available  
Maximum Length 2000 mm  
Maximum Temperature 180 Deg C  
Detailed drawings and process capabilities available from [www.temperature.com.au](http://www.temperature.com.au)

NBR Float  
18 mm dia  
SG = 0.5

## ANALOGUE 4-20 mA OUTPUT LEVEL SENSING

Custom manufactured all 316 Stainless Steel Continuous Liquid Level control using Resistor chain input into head mounted transmitter giving 4–20 mA or 20–4 Ma output signal.  
Maximum Temperature 120 °C  
Maximum Length 1800 mm  
Process Connection 2" BSP or 2" Table Flange or ANSI size flanges as specified.

**SD 737**

# XCO CONTINUOUS THERMOCOUPLE

## Continuous Thermocouple

The Continuous Thermocouple is designed to sense temperature increases in areas too large (or important) to be covered by multiples of typical temperature sensors (e.g. standard thermocouples or RTD's). In order to understand the operation of a Continuous Thermocouple, it is important to understand the theory which made the development of these unique temperature sensors possible. Both **FTLD** and **CT<sup>2</sup>C** have the same operating characteristics and detect the hottest temperature existing along their entire length.

## Hot spot detection

Continuous Thermocouples generate a measurable voltage like normal thermocouples, however, the measuring junction in a Continuous Thermocouple is not formed by directly joining the two wires. More remarkably, the measuring junction is not fixed but, when subjected to an increase in temperature, becomes concentrated at the hottest point anywhere along the sensor's entire length. This is due to the large fall in resistance in the insulating material at the heated area.

The nature of this insulating material is such that the voltage developed between the two wires always relates to the highest temperature.

# MARSHALL EXPENDABLE THERMOCOUPLE

Complete lances made to order

**SD 064**

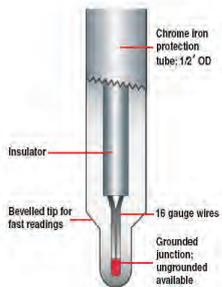

8" & 12" Tips Stocked

- Suitable for use in Molten brass, copper, aluminium and other non-ferrous metals
- Manufactured with Special Limits Class 1 Thermocouple wire
- 16 AWG solid Type K wire with ceramic insulators
- Custom Lances, wire and tip lengths are available on request

## Marshall Expendable Thermocouples

Marshall thermocouples are designed for Intermittent temperature sensing of molten metals up to 1250 °C

Model	Description	Price
TCKMT843	8" Tip with 43" long leads	\$72.00
TCKMT1243	12" Tip with 43" long leads	\$105.00

# THERMOCOUPLE PROTECTION SHEATHS

Temperature Controls have available from stock a large range of ceramic sheaths. Dimulit / Pythagoras ceramics are the most economical impervious ceramic material for use as a protection sheath for thermocouples. They are gas tight and suitable for use to 1400 Deg C.

Rubalit / Alsint / Alumina ceramics have an Alumina content of 99.7% and are best suited for use with noble metal thermocouples. Rubalit sheaths offer a high working temperature to 1700 Deg C and resist chemical attack.

Sizes available from stock in 600, 1000 & 1500 mm Lengths

6mm OD	4mm ID	Sheath COE
8mm OD	5mm ID	Sheath COE
10mm OD	7mm ID	Sheath COE
12mm OD	8mm ID	Sheath COE
15mm OD	10mm ID	Sheath COE
17mm OD	13mm ID	Sheath COE
20mm OD	15mm ID	Sheath COE
25mm OD	20mm ID	Sheath COE

## THERMOGUARD MOLTEN METAL SHEATH

The refractory laminated Thermoguard protection sheath offers the mechanical protection of metal tubes and the corrosion resistance of ceramics. Suitable for use in molten Aluminium or Zinc.

3/4" NPT Threaded Connection  
All sizes available from stock

Standard Lengths

12", 18", 24", 30"36"48"

## HEXOLOY PROTECTION SHEATHS

Hexoloy is a sintered silicon carbide sheath and is ideal as a high performance thermowell or thermocouple protection sheath. Hexoloy is the hardest commercially available material and provides a wide range of superior properties.

- High Temperature Strength to 1900 °C
- Excellent Thermal Shock Resistance
- Universal Corrosion resistance
- High thermal conductivity equal to stainless steel and 5 times that of alumina
- Exceptional Wear Resistance—50 % Harder than Tungsten Carbide

## SIALON PROTECTION SHEATHS

Sialon Thermocouple protection sheaths are a silicon nitride based high quality ceramic offering superior performance in molten aluminium with direct temperature sensing in the metal. Sialon offers

- Non wetting to Aluminium and it's alloys
- Excellent thermal shock resistance
- Low maintenance
- Constant temperature monitoring

# COMPRESSION FITTINGS

This represents the most popular fittings sold, many other sizes in tube and threads available from stock and indent
